2024 Texas A&M University  
Faculty Senate Presentation

**This presentation is for historical reference.  
The information will likely be updated.**

# What Do We Need From You?

- Scheduled contract let date Dec. 2025. What if this changes?
- Next steps (who/what/when/where/why/how)?
  - What are your questions about the design and construction schedule ideas?
  - What information do you need to make operational decisions? And when?
  - What operations are you willing to do differently? And when?
  - What do you have planned (or considering) in the next few years?
  - How do we engage your operation?

# Looking southwest from Kyle Field.

DRAFT: Design not final

Below-Ground Concept for Bush-Wellborn Intersection

# Looking south along Wellborn Road from near Kyle Field.

DRAFT: Design not final

Below-Ground Concept for Bush-Wellborn Intersection

# How Will We Build It?

DRAFT: Design not final  
These are only ideas.  
Some of these may not be possible.

- With any construction approach, the following will happen:
  - Project will be different than 2818
  - FM 2818 will be completed
  - Stay on schedule – Milestones; UP Railroad coordination; Move utilities; Cost plus time bid process; Incentive payments and disincentive charges
  - Extensive communication throughout the project
- Construction schedule ideas
  - Eliminate most schedule risk
  - Considering big city construction methods
  - Start work not affecting the flow of traffic

# When Everyone Has To Go Somewhere Else ....

Ideas – some crazy, some confirmed:

- Engage the community – from now through construction
- Minimize amount of time traffic flow is affected
- Adjust traffic signals and road configurations
  - DDI, FM 2818, Holleman/Wellborn intersection, widen Penberthy on campus
- Reduce vehicle travel across the railroad
- Change bus routes
- Check travel options – try a new route or mode
- Mobility coordinator - help travelers understand options
- Change parking lot designations and choices
- Change schedules and/or locations
- Anything else?

# When Everyone Has To Go Somewhere Else ....

Ideas – some crazy, some confirmed:

- Engage the community – from now through construction
- Minimize amount of time traffic flow is affected
- Adjust traffic signals and road configurations
  - DDI, FM 2818, Holleman, Weiborn intersections, Tiger Penberthy on campus
- Reduce vehicle travel across the railroad
- Change bus routes
- Check travel options – try a new route or mode
- Mobility coordinator – help travelers understand options
- Change parking lot designations and choices
- Change schedules and/or locations
- Anything else?

**Goal: NO Surprises (for anyone)**

## ***We're Building It!***

Tell us about your Bush-Wellborn travel and construction information needs.
