# Survey Background

- Online community survey that was open from March 2024 to December 2024 and intended for Bryan-College Station residents and visitors.
- The purpose of the survey was to gain an understanding about Bryan-College Station traveler information and construction needs.
- Received about 3,200 responses and over 3,000 comments from four free-response questions.

## Update On Building The New Interchange At Wellborn Road And George Bush Drive

April 10, 2024 Bill Oliver

Screen shot from <https://www.bwc-bcs.org/>

The spring of 2026 is the projected start of building an interchange at Wellborn Road and George Bush Drive.

Members of the Texas A&M faculty senate received an update during Monday's meeting (April 8) from senator Catharina Laporte.

She attended a senate planning committee where a presentation was given by administrators and officials at the Texas A&M Transportation Institute (TTI).

TTI research engineer Debbie Albert told WTAW News that the public is invited to complete a new survey on the project.

The survey asks among other things, the times you drive through the Bush-Wellborn intersection and how you want to be notified of construction updates.

The survey also gives you the opportunity to submit suggestions, comments, and concerns about the project.

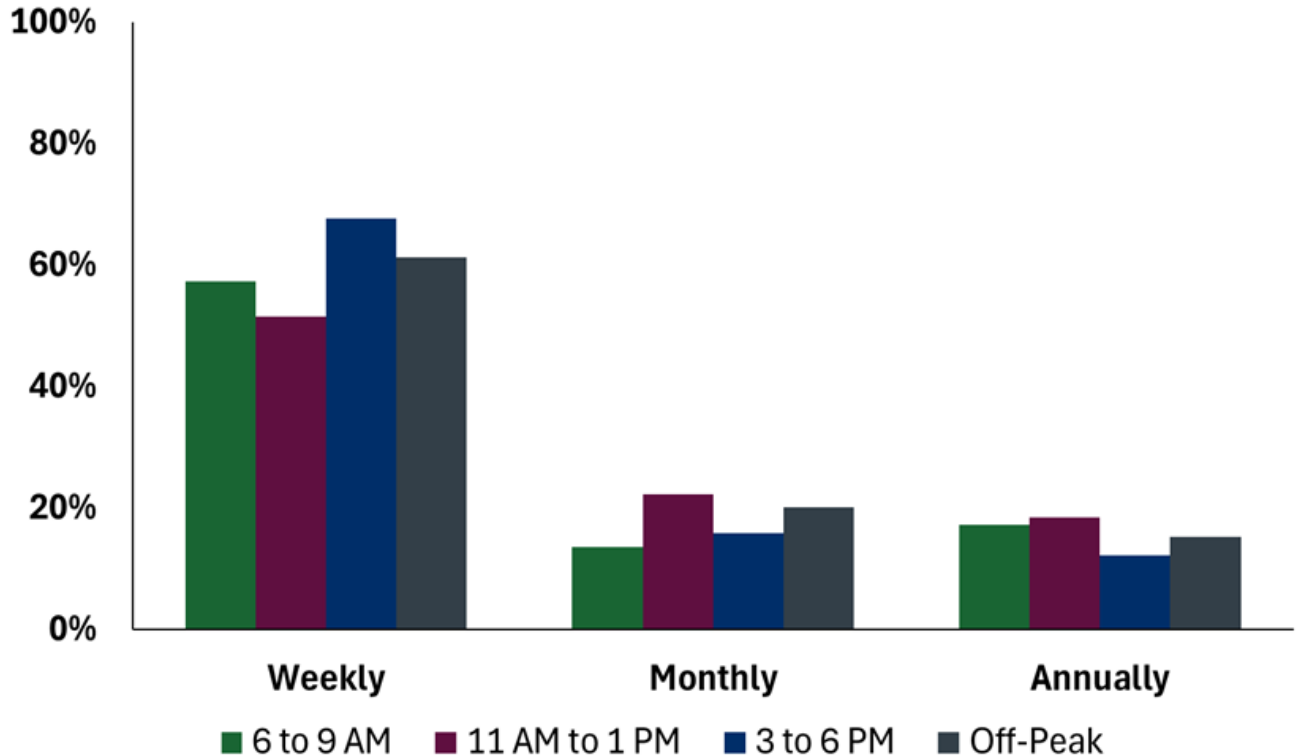

At the end of the survey, there is an invitation to send a request to meeting with TTI's public outreach team by sending an email to [bush-wellborn@tti.tamu.edu](mailto:bush-wellborn@tti.tamu.edu).

Click [HERE](#) to be directed to the website that contains the survey and more information about the Wellborn-Bush interchange project.

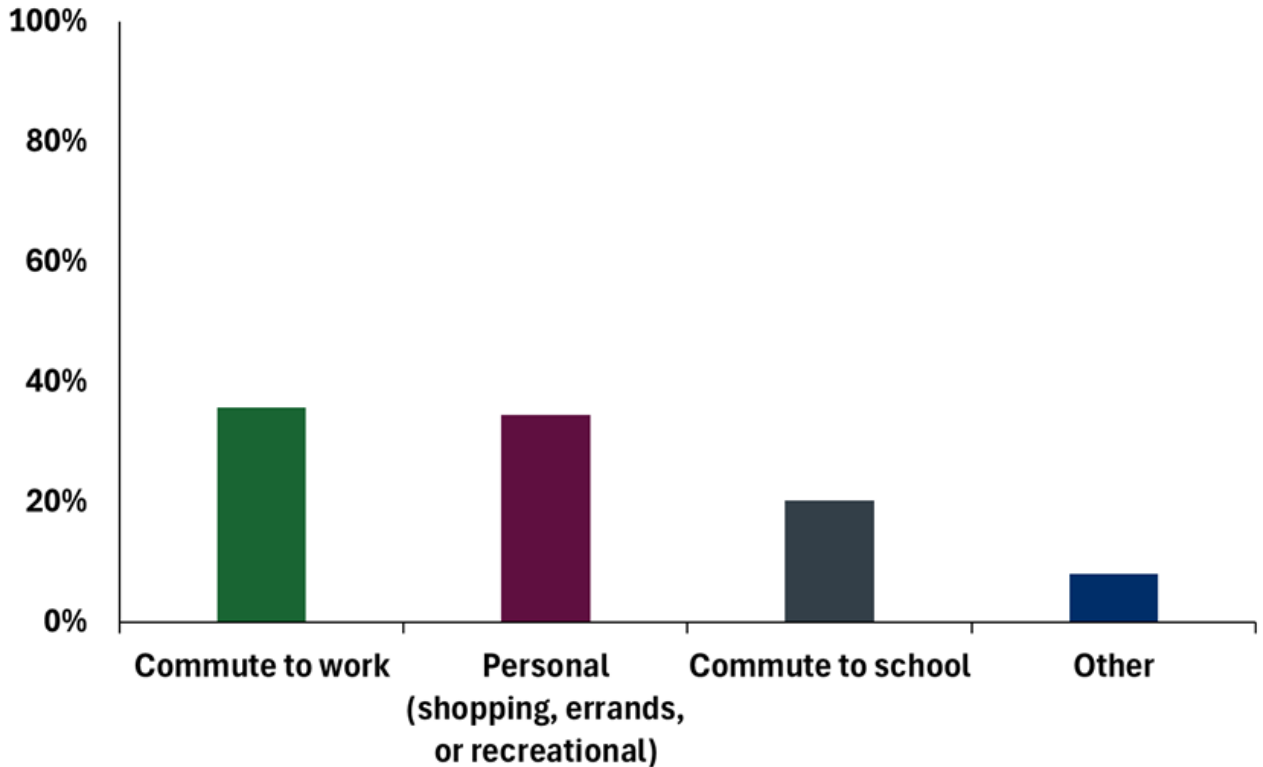

# Key Takeaways from Survey Results

- **Respondents want from the project team:**
  - Extensive communication that goes beyond what is traditionally done.
  - Information about construction phasing, before construction begins and throughout construction.
  - Construction phasing effectively communicated, through different forms, and readily available so the public can choose how to best consume it.
  - Timely and accurate information.
  - Coordination among the community agencies so the public has various travel options.
  - Construction done differently from past community projects, specifically FM 2818.

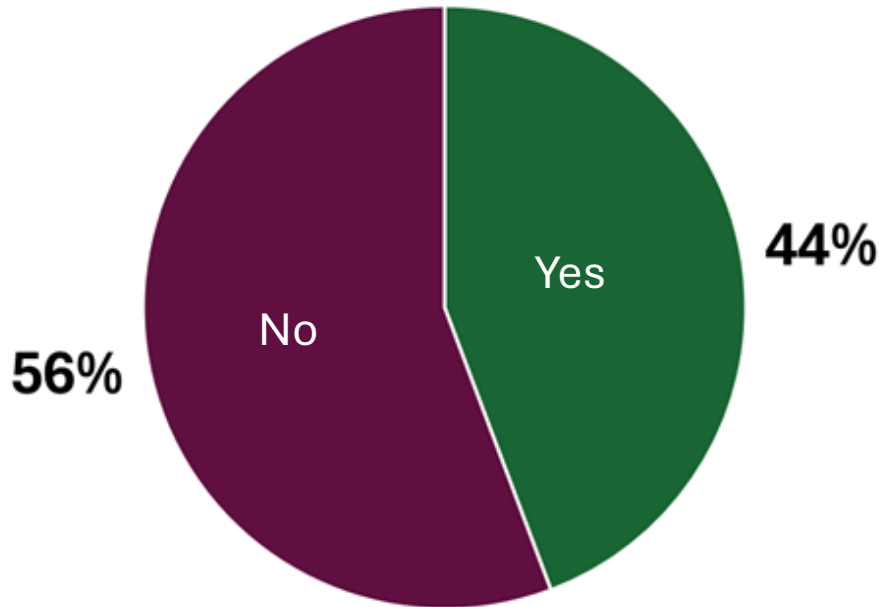

# Q1: How often and at what times do you travel through the Bush-Wellborn intersection. (Mark all that apply.)

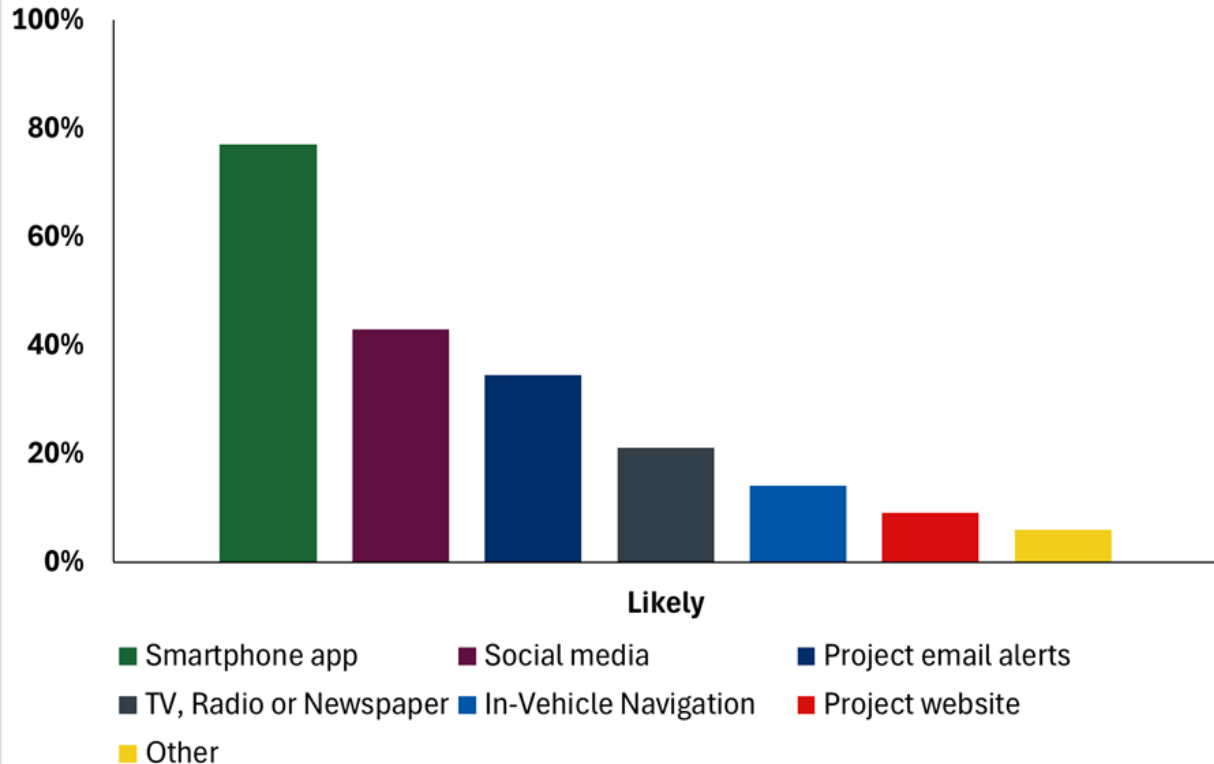

## Q2: What is your primary purpose of your trip when traveling through the Bush-Wellborn intersection. (Select only one.)

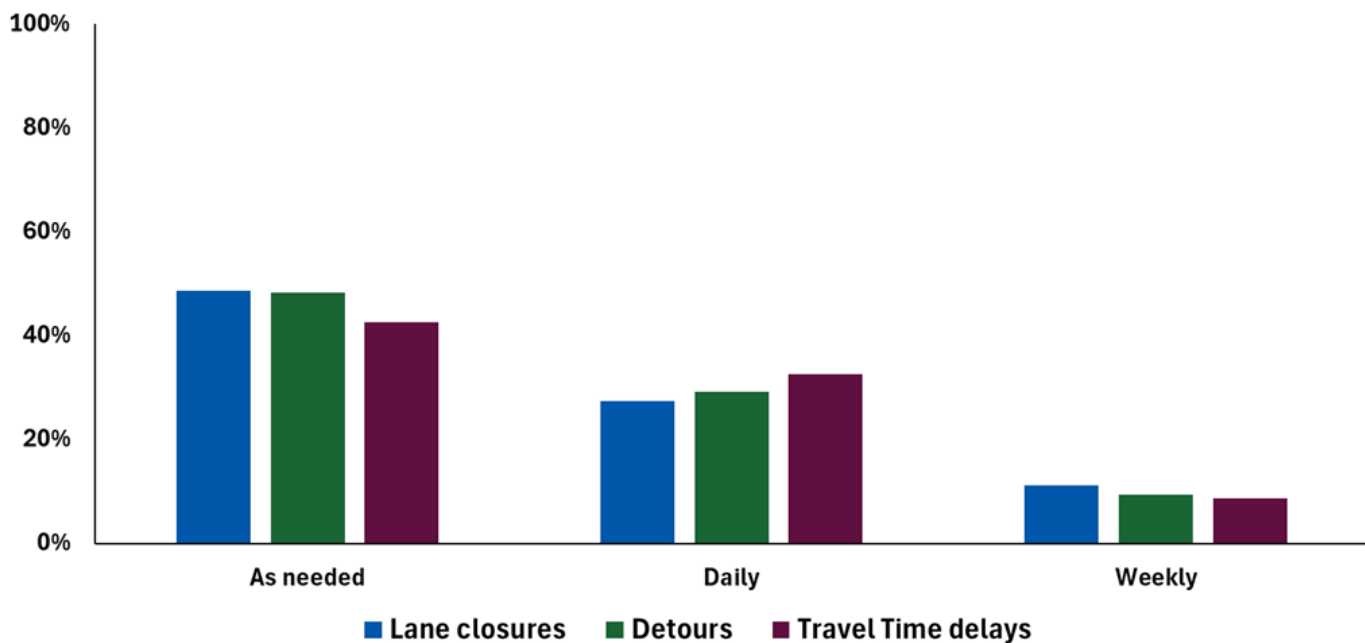

**Q3: Do you typically use travel information before or during your trips to help you make decisions on when to travel or what road to take?**

## Q4: Regardless of whether or not you use traveler information, please indicate how likely you are to use each of the following for traveler information.

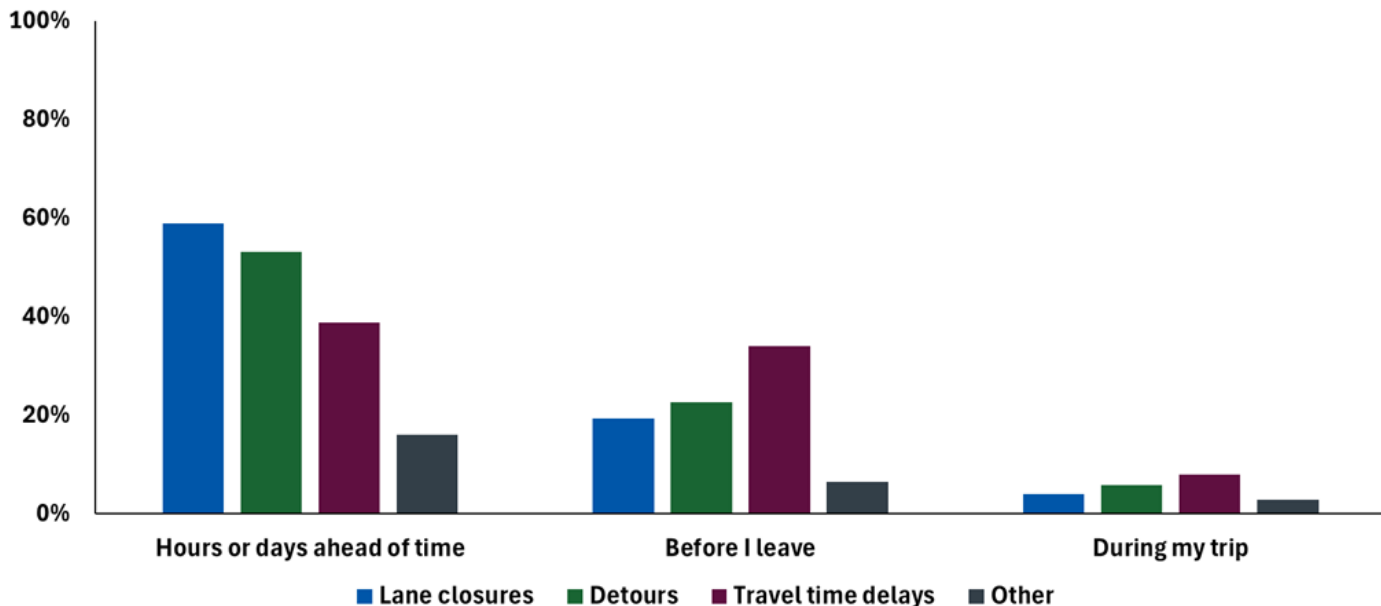

## Q5: Indicate how often you would want to receive the following types of information about travel through the Bush-Wellborn intersection.

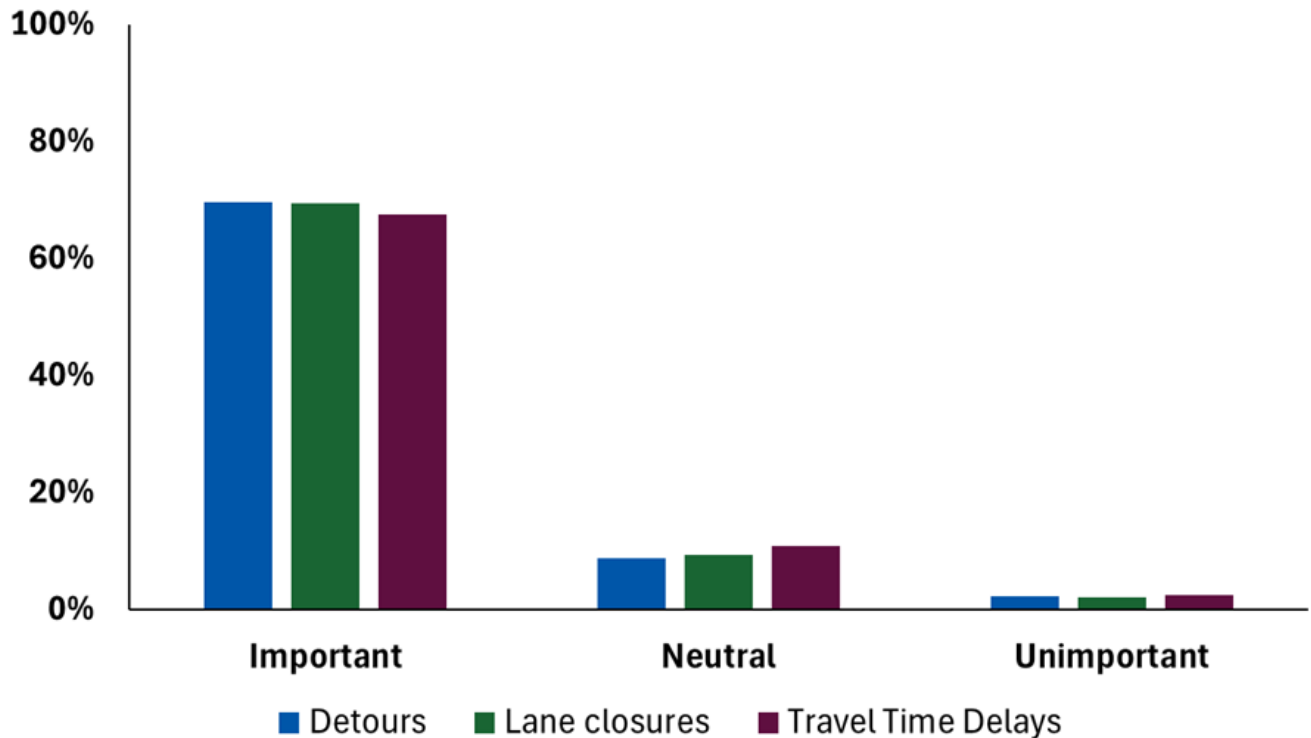

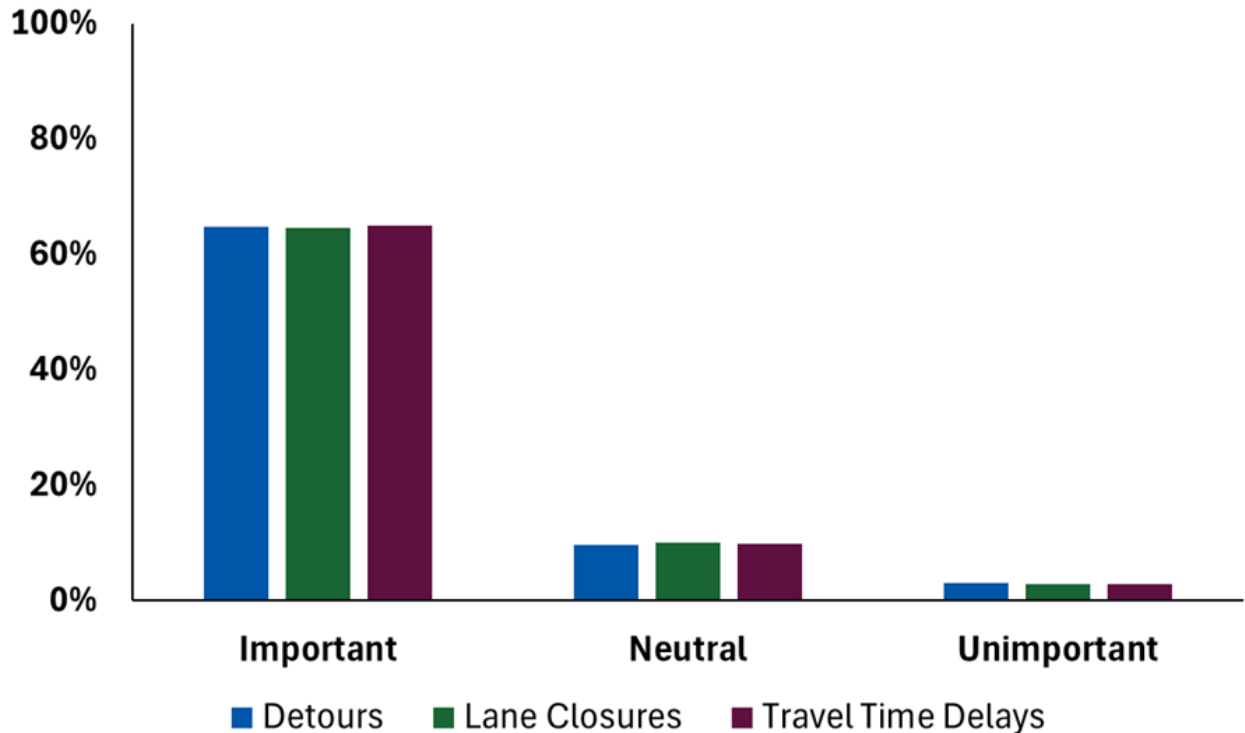

## Q6: Please use the chart below to indicate when you want to receive this type of information (Mark all that apply).

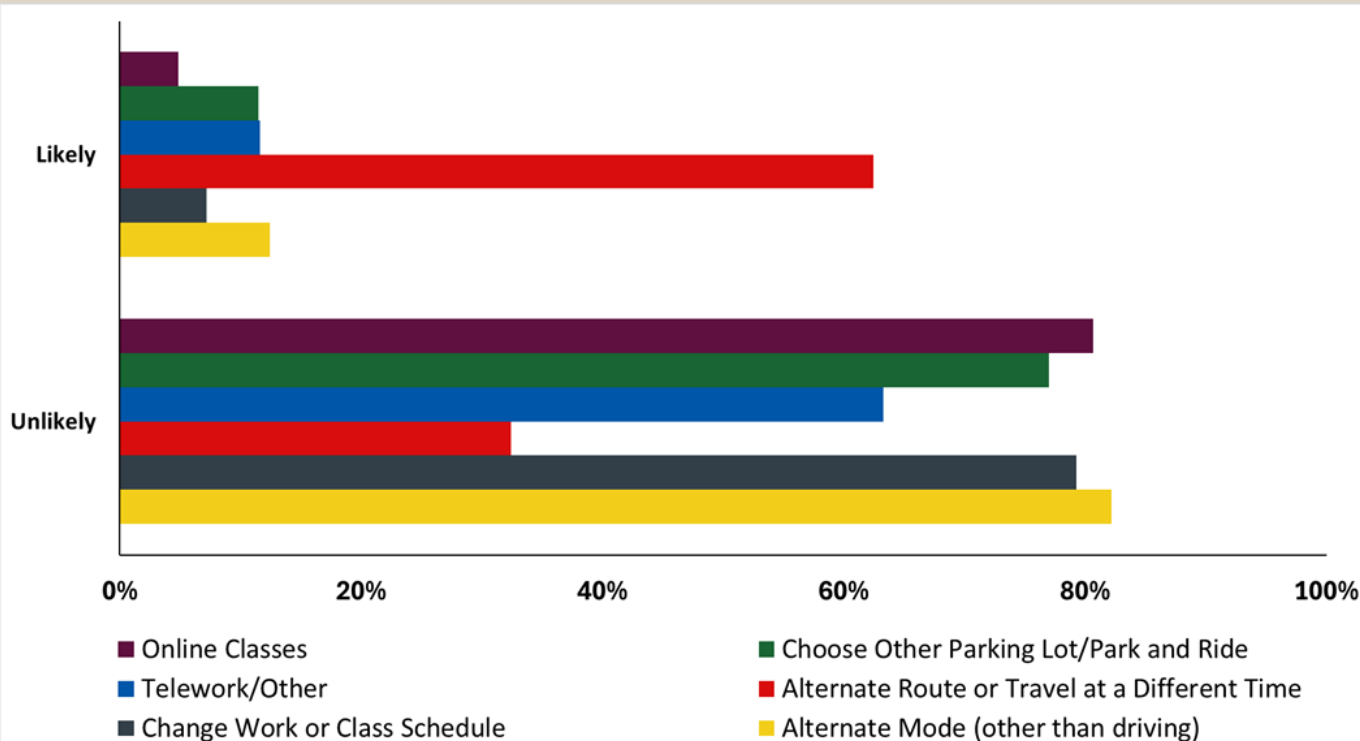

## Q7: Indicate how important the following types of pre-trip information are during different time periods.

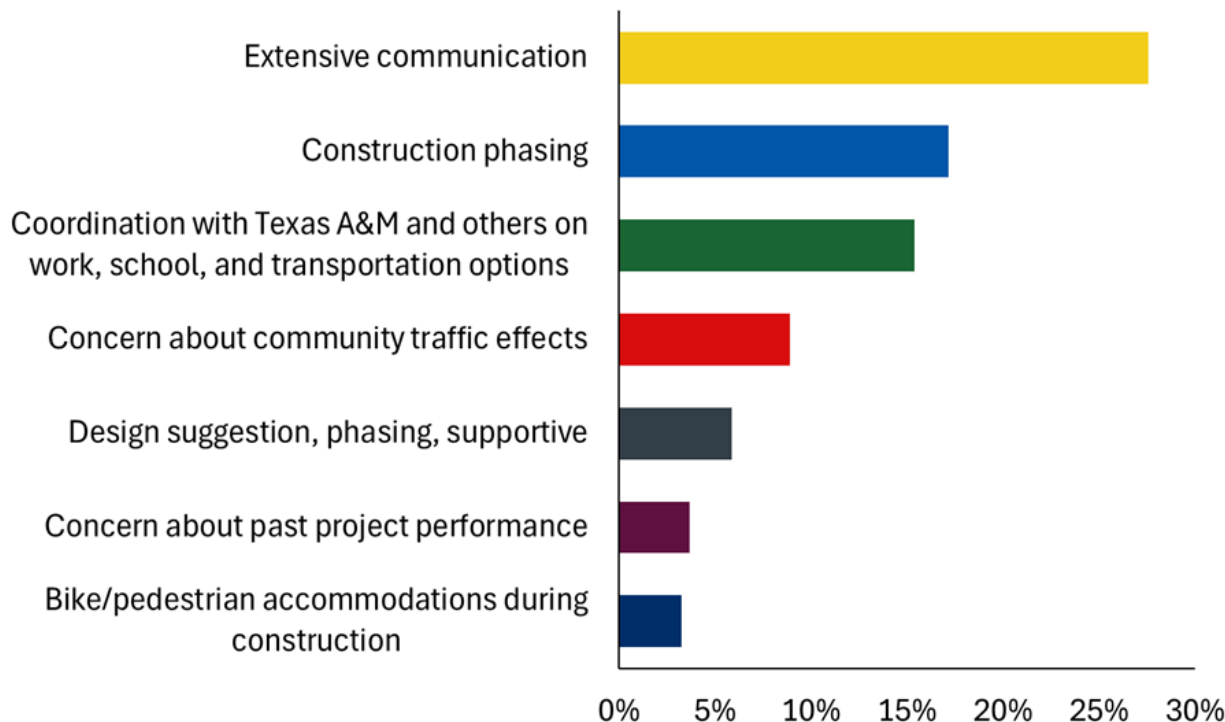

## Q8: Indicate how important the following types of en-route information are during different time periods.

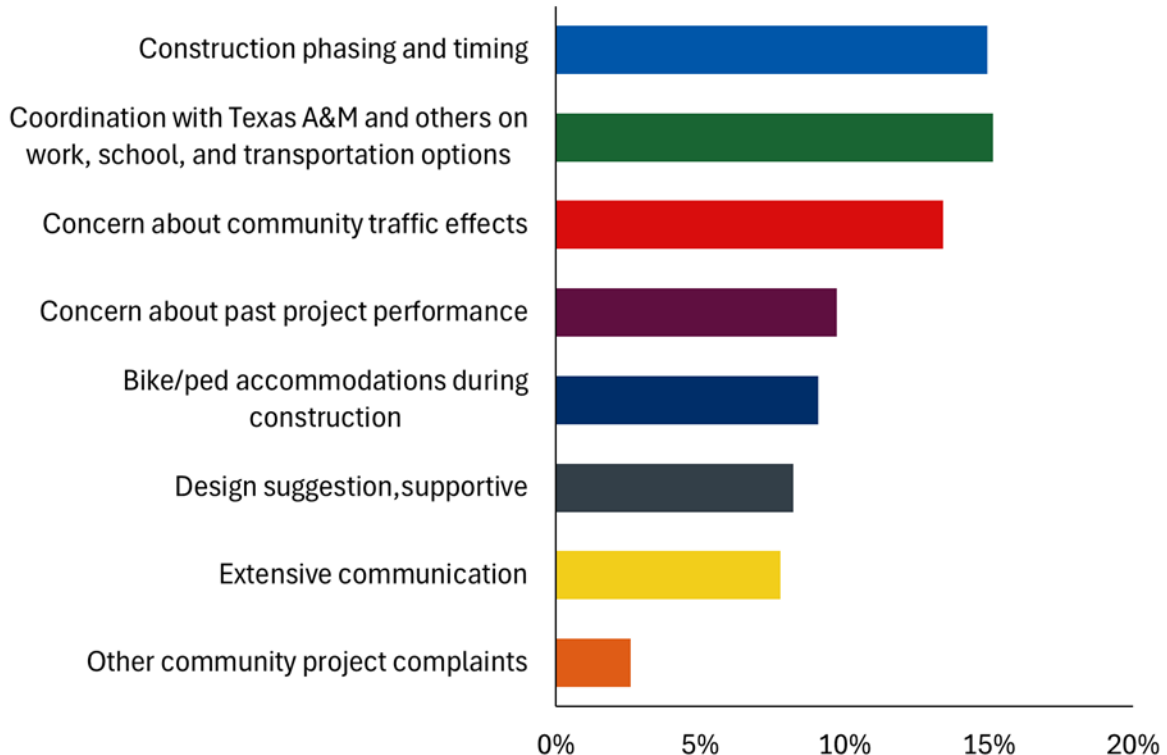

**Q9: Construction will require the intersection be fully closed for an extended period at some point. How likely are you to do any of the following to avoid the closure and resulting traffic congestion.**

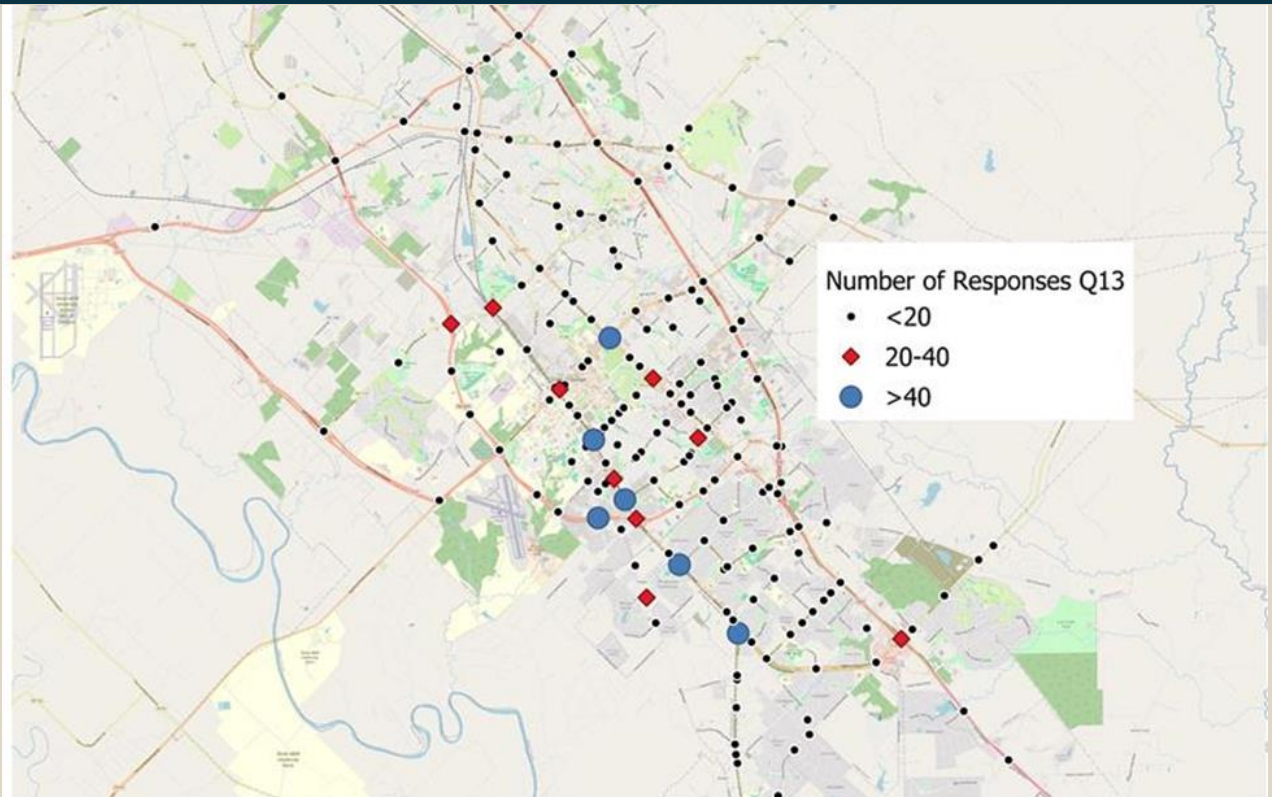

## Q10: If you have any additional suggestions about traveler information, please provide them here.

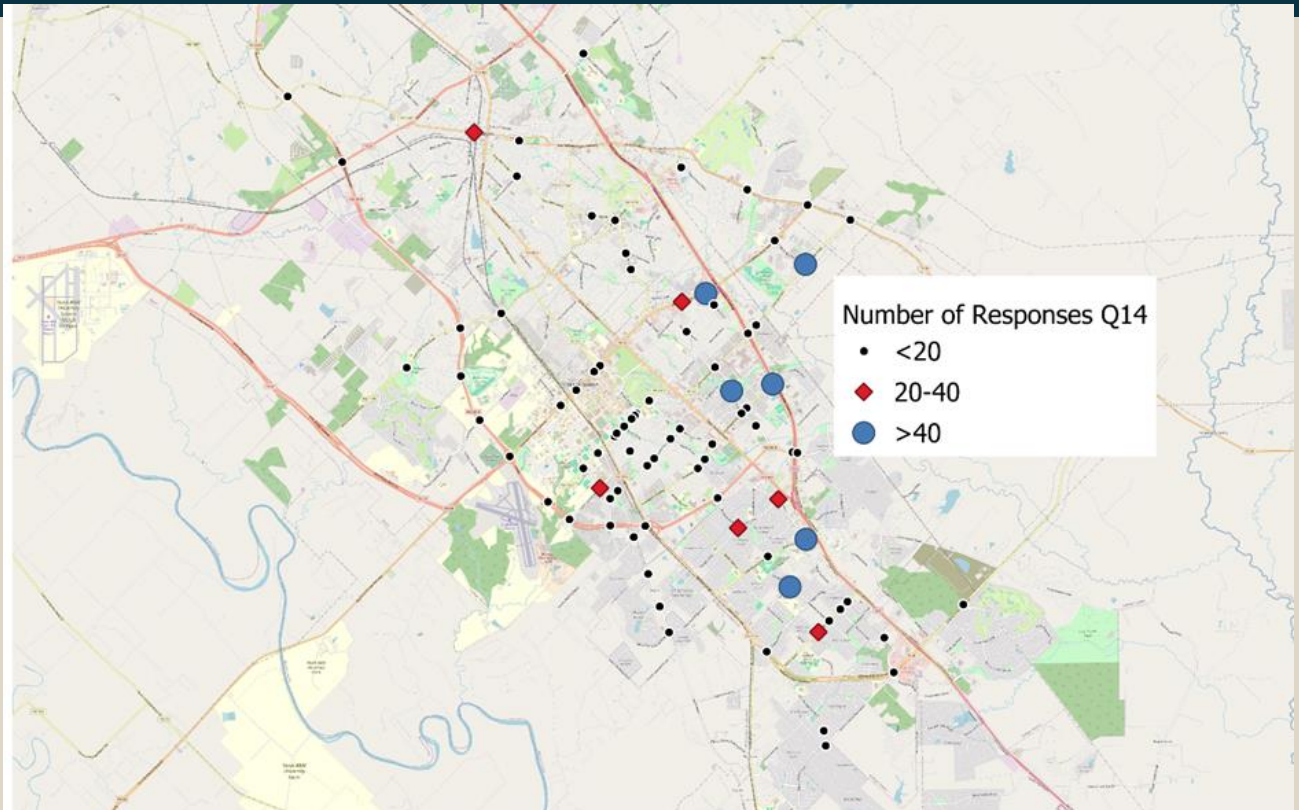

# Q11: If you have any additional comments or concerns, please provide them here.

**Q12: Please tell us about yourself so that we can evaluate how well our process represents the views of the community. What major intersection is closest to your home (e.g. Anderson-Southwest Parkway, South Holleman-Deacon, etc.)?**

**Q13: Considering your primary reason for travel through the Bush-Wellborn, what major intersection is closest to your destination (e.g. Bush-Penberthy, Wellborn-Kimbrough, etc.)?**
